

# 7/8" Corrugated

Deep 7/8" ribs for commercial strength in a classic wave corrugation profile.

7/8" Corrugated is our tallest and strongest corrugated panel. Ribs are closely spaced, providing the strength for industrial and commercial applications. Higher ribs also allow installation on slopes as low as 1:12.

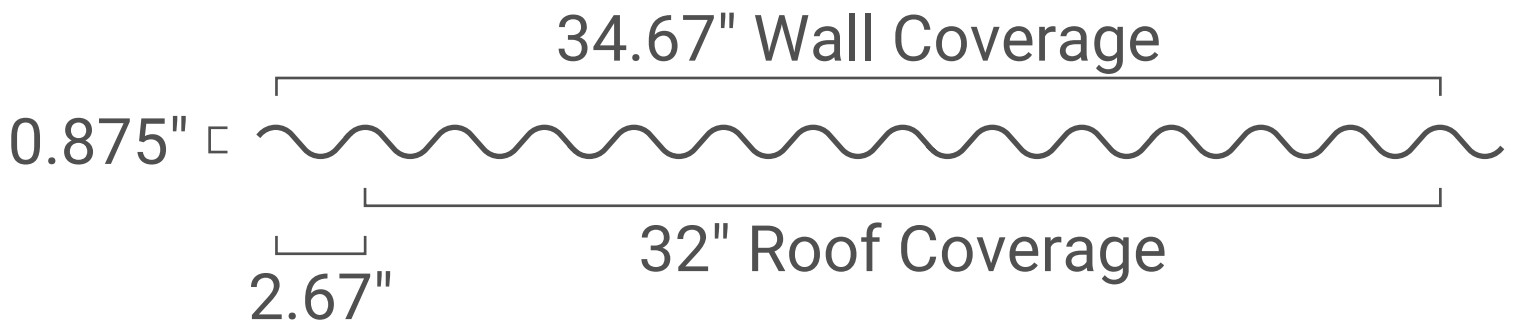

# Design & Size

We provide 7/8" Corrugated cut to the inch per specification. 7/8" Corrugated design features 7/8" high ribs, spaced 2.67" on center.

On roofs, ribs are lapped 2 ribs, while on walls, ribs are lapped 1 rib.

# Warranty & Finish

7/8" Corrugated is available in both SMP painted, Kynar 500® painted, and non-painted Galvalume.

Unpainted Galvalume is popular for industrial/commercial roofs, while the painted options are popular for roofs and walls of industrial, commercial and general purpose buildings.

# Purpose & Use

7/8" Corrugated has the strength to span open framing up to 5' apart - allowing incredible strength and saving on material costs.

Common uses for 7/8" Corrugated include horizontal and vertical oriented walls as well as use as a high-strength roof panel. Painted, Galvalume, and specialty finishes make 7/8" Corrugated a look all your own.
