

1/4" Std. Magnetic Hex Driver
For standard wood screws

5/16" Std. Magnetic Hex Driver
For Ultimate, self drilling, and lap screws

Two Sided 1/4", 5/16" Magnetic Hex Driver
For nearly any screw - reversible design

1/4" Long Magnetic Hex Driver
For standard wood screws

5/16" Long Magnetic Hex Driver
For Ultimate, self drilling, and lap screws

1/8" Double Sided Drill Bit
Optional, may be used to predrill screw holes

TurboShear HD Drill Attachment
Attaches to corded or cordless drill. Cuts panels including straight and diagonal cuts, even over ribs.

Long Cut Snip
General purpose trim and panel snip with extra long blades

Right/Straight Snip
Specialized snip for right and straight cuts on trim and panels

Left/Straight Snip
Specialized snip for left and straight cuts on trim and panels

Metal Cutting Blade
Cooler than regular saw blades, though best for hidden cuts due to burning paint coating.

3" Hand Seamer
For trim finishing - compound leverage and comfortable handle for easier use.

6" Hand Seamer
For trim finishing - compound leverage and comfortable handle for easier use.

Turn-Up Tool
Turns up flat portion of panel upper ends at ridge, endwall, or transition. Provides added protection from rain.

Cut-Resistant Glove Standard
Latex texture coated Nylon for protection against cuts & nicks

Cut-Resistant Glove Insulated
Insulcore® Thermal lining with a 13 gauge Hyperon™ shell & NitriX® Grip coating for cut & nick protection

Cut-Resistant Arm Sleeve
Engineered from polyethylene, fiberglass and synthetic fibers for ANSI Cut Level 3 cut resistance

Roof Fall Protection/Safety Kit
Includes rope with adjustable shock-absorbing lanyard, roof anchor, & safety harness all in a convenient storage bucket

SteelWalker Magnetic Boot
Increases foot traction on steel roofs. Not a replacement for fall protection

Steepgear Roof-Grip Shorts
"Sticky Shorts". Reduce risk of sliding down steep sloped surface by slowing descent. Not a replacement for fall protection
